site service and full workshop rebuilds to all brands and sizes

Purpose built equipment for factory quality rebuilds

Fully pressure tested for
constant power settings

Maintaining a regular servicing schedule for your boom systems and attachments is the best way to ensure your equipment perform at its optimal efficiency, and to prolong the life of your investment. It also helps you avoid unnecessary downtime.

Quick Turnaround Time And Onsite Service

Keeping your operation running smoothly is our goal. With a dedication to customer service our experienced technicians rebuild, service and repair hydraulic attachments and boom systems in all makes and models in our custom designed workshop.

No matter how big or small your attachment is, we are at your service and work towards a quick turnaround time ensuring your attachment is back on site without delay.

Our dedicated site-service team come to you whenever an emergency repair or other assistance onsite is required.

Setup and Installation

- Commissioning of new equipment
- Installation of hydraulic piping
- quick hitch piping & auto-lubrication systems

Commissioning is the final step before your new attachment is ready for work. Our technicians will perform commissioning including installation of hydraulic piping, quick hitch piping and auto-lubrication systems. Commissioning will be completed with thorough testing before final handover of the unit to the owner or operator.

TRS technicians have a broad base of know-how related to attachment installation and operation and understanding how the attachment should function in your application to ensure it performs at its optimal efficiency.

Rockbreaker Boom assembly repairs of all sizes

They can offer you advice on correct operation of the equipment and matching the right tool to the job application that are critical to achieving the highest level of production with the lowest possible operating costs.

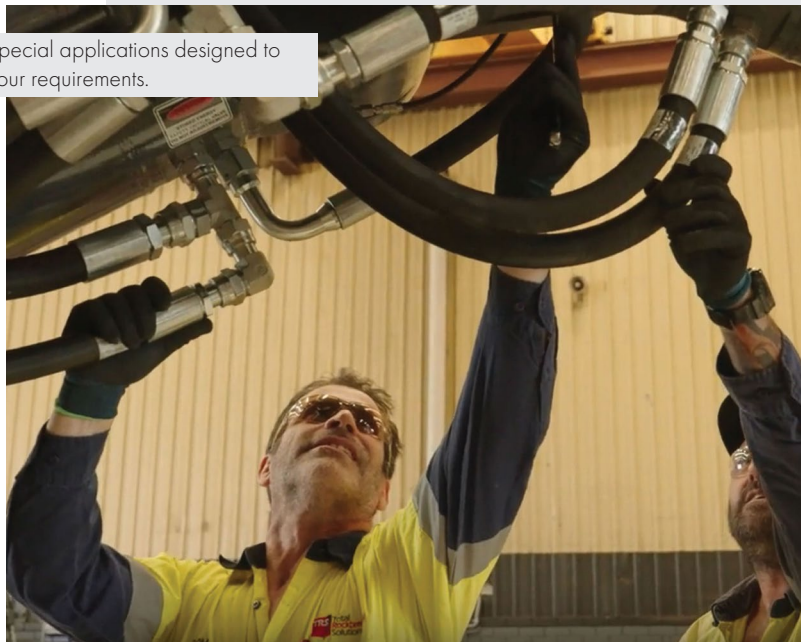

Annual Rockbreaker Service

A regular rockbreaker maintenance and service help increase the equipment service life and prevent unnecessary downtime.

Our annual rockbreaker service includes:

- Strip, Assess, and Inspect rockbreaker assembly parts
- Clean and Inspect all parts to OEM Spec
- Crack test critical parts
- Repair or replace worn-out parts
- Piston polish if required
- Test mechanism on the hydraulic test bench for optimal performance
- Re-Paint casing and Head bracket
- Reassemble and pack the rockbreaker ready for approved transport

Special applications designed to your requirements.

Right tool is a key to productivity

Choosing the right tool for the job will have a major impact upon the power and productivity of your attachment.

You can select the right tool for your application from a great range of genuine tools, parts and consumables that are readily available in our warehouse.

Tool material can be 100% recycled

Rammer have set environmental objectives to reduce their consumption of energy and raw materials to decrease emissions. Their tool manufacturing chain follows ISO 14001 standards from steel mills to the Rammer warehouse and Tool material can be 100% recycled.

Authorised Service Provider

TRS is the authorised service, spare parts and tools supplier for Rammer, ALLU, PneuVibe and Simex Attachments in WA.

storage and transfer solutions

Ask about our customised storage boxes as a solution to store your attachment when not in use. Transport your rockbreakers and boom systems securely and safely in our customised transfer frames that are third party certified according to national transport commission, NTC guidelines.

Total Rockbreaking Solutions (TRS) offer a full range of boom systems, excavator and skid steer attachments and specialty products for demanding applications such as rockbreaking, demolition, trenching, tunnelling, crushing, rock profiling, road milling, stabilising and road repair.

As the authorised dealer for Rammer, ALLU, Simex, PneuVibe, Daehan and TEFRA, we can ensure that our existing and new customers receive the industry's highest-quality support, while enjoying the industry leading performance and reliability they have grown to expect from these products.

TRS have been awarded with an Australian Rammer Dealer of the Year Award for 2014 and 2017, Certificate of Excellence in 2016 and Certificate of Service Excellence in 2017 by Sandvik Mining and Rock Technology.
